

► STORAGE SOLUTIONS - 2D

## NXT*rack*

### 2D Storage Solutions

PharmNXT *NXT*rack Systems are key components in delivering efficient, ergonomic and scalable process solutions for your bio-production needs. PharmNXT *NXT*rack systems are designed to reduce operator error and improve process efficiency. With a full spectrum of systems to choose from, you get greater flexibility, mobility and support for your single-use technologies.

Handling 2D process containers can be difficult. When lying horizontally, emptying the containers can be difficult and air entrapment can risk product quality. Using several containers in a manifold can be messy, unwieldy and can lead to operator error.

### **Easy to Use:**

PharmNXT Biotech's NXTrack systems are specially designed to make container handling and storage easy and safe and to protect both container integrity and their valuable content. Mobile racks with small footprints provide maximum flexibility and can support process containers in 10L, 20L and 50 L capacities. It consists of a frame and six container crates that slide forward and lock in place for easy loading and unloading. An innovative tilted handle design allows maximum drainability. Removable container crates with an easy locking mechanism provides greater safety and ease of operation for loading and unloading. The removable container crate slides forward and locks in place for easy loading and unloading.

### **Specifications:**

Crate Qty: 50L X 6NOS  
Dimensions ( L x W x H mm.) :  
965 x 950 X 1560  
Moc for Rack: SS 304  
Moc for Crate: SS 316  
Castor Wheel: DIA. 150 X 50 Heavy  
uty - SS PU  
2 Swivel & 2 Swivel  
Tilting Mechanism: Hand-Operated  
Mechanical Rack and pinion type  
Finish: Matt

### **Support**

PharmNXT Biotech supports users from the design to the execution phase of a new and existing production facility with the most comprehensive support program, that ensures the successful design, implementation, and validation of the manufacturing facility. PharmNXT Biotech offers end-to-end solutions for Pharmaceutical, Biopharmaceutical and Vaccine manufacturing.

### **Quality Assurance**

Our NXTrack systems are designed, developed, and manufactured in accordance with ISO 9001:2015 certified Quality Management System. They undergo extensive testing before shipping. We make sure our products are manufactured according to cGMP and are suitable for cleanroom process.
