Defined Tubing Limited:

We are excited to announce our association with **Defined Tubing Limited** (<http://www.definedtubing.com/>), a leading global innovative solution for management of single using tubing in the biopharma plant.

Defined Tubing Limited has appointed PharmNXT Biotech as Exclusive Licensed Installer of DRT™ systems for the entire Asian market.

DTR™ is the first mass produced product to tackle the problems associated with single use Tubing management. The modular approach used offers excellent flexibility and robust construction needed in the pharmaceutical sector.

Concept – Using Prefabricated fittings, plates and Brackets to manage single use tubing to ensure:

- No tubing touches the floor
- No interference in unit operations
- Interconnecting tubing do not come in pathways for easy man and material movement
- Easy height adjustment for fitting tubing
- Color coding - Ensure no errors by operators for inlet, outlet and waste tubing

DTR™ Trunking, a brand-new way of managing single use tubing. Our DTR™ Trunking system is as innovative new product range unlike anything else on the market. Specially designed for cGMP application, a DTR™ system is the best choice to improve first impression, reduce trip hazards and reduce the risk of error.

We sincerely believe that the adoption of DRT™ system for tubing management and routing will help our customers resolve the challenges they routinely face in managing their single use facilities efficiently.

Best regards,
Team PharmNXT Biotech
