ILC Dover:

We are glad to announce the signing of partnership agreement with ILC Dover (<http://www.ilcdover.com>). Via this agreement, PharmNXT Biotech LLP will be the exclusive partner of ILC Dover for the Indian Market where PharmNXT Biotech will be responsible for all techno-commercial, pre-sales and post-sales support activities for customers in India.

ILC Dover has competencies in materials, soft goods design and manufacturing to create safe and reliable products that protect people and equipment in hostile environments. **ILC Dover is the first company to commercialize disposable, contained powder transfer systems.** ILC Dover also pioneers in **Flexible Containment systems.**

ILC Dover provided solution in following areas for Pharma and Biopharma applications:

Pharma: -

- Process Equipment containment
- Flexible Isolators
- Single Use Powder Handling

Biopharma: -

- Single Use Powder Transfer
- Containment
- Mixing

ILC Dover supports Pharmaceutical and Biopharmaceutical customers with disposable systems engineered to contain powder transfers from cGMP to nanogram levels. With over 300,000 successful installations world-wide since 1997. One of the key elements of our line of products is the regulatory friendly, slip agent free, ArmorFlex® material. These films are custom formulated to deliver superior elongation performance (nearly 500%) for ruggedness and high strength. This feature coupled with a unique blend of safe and effective anti-static additives allows the DoverPac® products to deliver reliable high-level containment.

ILC Dover has provided Flexible Containments to Flexible Enclosures for Blenders, Centrifuges, Dryers, Encapsulators/ Tablet presses, Filters, Granulators, Mills, Reactor charging, Screeners/Sieves and Weighing and Dispensing application.

We believe that the availability of ILC Dover's products in India will bring a significant advantage for customers in providing further level of production to personnel and products they manufacture.

Best regards,
Team PharmNXT Biotech
